REPORT ON CLOUD COMPUTING

DATE: 26 Feb 2015   **TIME: 9-11.20AM**   **VENUE: MMR**

MODE: VIDEO CONFERENCE

COMPANY: STEPAHEAD (California)

AUDIENCE: SYIT AND TYIT STUDENTS WITH PROFESSORS

ORGNISED BY : IT DEPT

---This conference was from the pioneers in Technology "STEPAHEAD". Cloud Computing is the latest happening in Technology. It was interactive session where concept of cloud computing was told along with demonstration. Illustrations were clear and in simple language.

 All were amazed to see the demonstration of feature called as ODL(On demand Laptop) which could be provided in few minutes, for example suppose one has any Operating System and one require Windows2008 Server machine with good hardware feature then it is possible to get it immediately from cloud without spending on hardware cost.

At the end students asked questions and all questions were answered to the satisfaction of the students. We would request for one more conference from them in the coming term. Also we are exploring   on the ideas told   . Also free ODL is being provided . It requires one time registration over the website :

A spark to learn more has been initiated through this conference which is evident from the feedback so far collected.

1) Thanks a lot for the session. A new Technology ODL was introduced . This may help in future. Hope to learn more on this concept. Thank you. (Student)
2) Nice and interactive session . Doubts were cleared nicely and we got to know more about new Technology Like Hadoop. Cloud Computing. (Student)
3) Nice Session, gives an idea of one of the many alternatives available.(Faculty)
4) It's a new direction of thinking . The problem which was time consuming to solve appears easy to solve when new ways of solving is applied after understanding the concept of cloud computing in this conference. (Faculty)
5) It was enlightening experience.   (Student)
6) It was very informative. Interest in this subject has increased.(Student)
7) We look forward to future sessions. (Student)
8) The concept of ODL was very good. Came across the term of private cloud. Overall a very enlightening session. (Student)
9) It was good experience to understand new concepts related to latest technology.
10) Informative session as we got to know new topics. Also helped for TY projects. (Student)
11) It was really good looking forward for some more sessions like this in future. . (Student)
12) The live session was interesting and interactive. Got to know new things which increased my curiosity for the same. It was very informative and helpful . Looking forward for some more sessions . (Student)
